Quick Guide for Students
HACU & Grow with Google
HSI Career Readiness Program

In partnership with Grow with Google, The Hispanic Association of Colleges and Universities (HACU) is launching the Grow with Google HSI Career Readiness Program at NMSU. The new initiative will provide Hispanic-Serving Institutions (HSIs) with a grant to launch an evidence-based digital skills curriculum, created by Google, to help Latino students build their careers and increase their economic potential. Through the program, Google will partner with HACU and invest $2 million to help HSIs train 200,000 students on digital skills by 2025. All NMSU students can participate.

Below is a step-by-step process of how students can participate and register their account on the HACU/Grow with Google (GwG) learning management system (LMS).

Step 1: Students can self-register in the Talent LMS. This option is ideal for students who are not taking a course with one of the HACU/GwG professors at this time, but wish to participate. The link to self-register is: https://nmsu-hacugwg.talentlms.com/index. However, if you're already registered through your class, then find the email sent to your MyNMSU account and proceed with the activation instructions.

Step 2: Students choose a core lesson from one of the available pathways or select a suggested/required core lesson designated by their professor. A core lesson should take less than 1 hour to watch.

Step 3: Students watch the videos in that core lesson. They can watch the video and follow along with the activity or just watch the video and do the activity at some other time. After watching the assigned video(s) in that core lesson, students might be asked to complete a quiz or a short survey. Once the survey and core lesson are complete students should receive a "Congratulations" note that they have completed the core lesson.

Step 4: After completing a core lesson, students can upload proof of the completed lesson by submitting a screenshot or picture of the "congratulations" notification into their designated Canvas assignment (if this activity is required for a class). If the professor provided different instructions to show proof of completion, please follow those instructions instead. Professors can then verify in the LMS that the core lesson(s) is/are completed.

Ethical Statement: As part of the HACU/Grow with Google HSI Career Readiness Program, neither HACU nor Google will use your information without your consent. Your information will not be sold to a third party. You will not be required to register for a Google account. Choosing to do is your decision. You can watch the videos and do the work without a Google account if that is your preference. If there are any concerns regarding privacy and/or the platforms that this program uses, please contact the Co-PI of this project, Dr. Spencer Herrera at spencer@nmsu.edu.
